Paper: TCSVT-00324-2016.R3 Image Class Prediction By Joint Object, Context and Background Modeling

Dear Dr. Zhang:

Congratulations! Based on the recommendation of Associate Editor Prof. Jie Liang, I am pleased to inform you that the above paper has been ACCEPTED as a Transactions Paper for publication with no further changes in an upcoming issue of the IEEE Transactions on Circuits and Systems for Video Technology.

The IEEE Transactions on Circuits and Systems for Video Technology has a commitment to deliver valuable technical information to the video technology and systems community in a timely manner. To that end, the IEEE Transactions on Circuits and Systems for Video Technology, its editors, and staff are making every effort to ensure that the submission of finalized papers not be unduly protracted. We hope you will assist us by the careful preparation of your final submission.

Please note that except for exigent circumstances of which you can notify us in writing in advance, we will expect to receive your final materials no later than TWO (2) weeks from the date of this letter. Delay will result in removal of the paper from the list of papers awaiting publication.

Make sure to upload ALL materials listed below through the "Awaiting Final Files" link in the submitting author "Author Center" on ScholarOne Manuscripts. Do not send ANY items via email, regular mail, or fax, as they will not be processed.

Please upload all files in a single session using "submit final files" link, and make sure that your files are correct and complete upon submission. After you upload the files, you will receive confirmation that the final files have been received. Once your final files are submitted, you will not be able to make any changes until you receive the galley proofs from the IEEE.

To assist publication, ALL of the following items are REQUIRED to process your paper:

[] Properly executed IEEE copyright form. The IEEE policy requires that prior to publication all authors or their employers must transfer to the IEEE in writing any copyright they hold for their individual papers. If you did not submit your IEEE Copyright Form with your initial submission, please return to your Author Center to submit the electronic IEEE Copyright Form (eCF). Click on the "Manuscripts with Decisions" list item under "My Manuscripts". An entry for the manuscript you just submitted will appear and will show a link to "Transfer Copyright". Click on it to electronically sign the eCF. Submission of a signed IEEE Copyright Form is required before your manuscript may enter the production queue for publication.

[] One PDF file of your final manuscript with the text, abstract, figures and tables, all references and authors' bios w/photos in Single-Column Double-Spaced format (One full blank line between lines of type).

[] One PDF file of your final manuscript including text, abstract, figures and tables, all references and authors' bios w/photos in Double-Column Single-Spaced IEEE format. You should generate this PDF directly from your source file. (This file will be used to verify the consistency and correctness of any formatting conversions required in the processing of your source files for production.)

NOTE: The Double-Column Single-Spaced IEEE format PDF file will provide the approximate publication length of the manuscript. It also serves as additional confirmation of your understanding that you are responsible for over-length page charges in the amount of \$175 per page for all pages in the published

version of the article that exceed 9 pages. Detailed information on these charges will accompany the galley proofs sent to you prior to publication.

IMPORTANT: The following must appear on the first page of all PDF files when the final paper is submitted:

"Copyright © 20xx IEEE. Personal use of this material is permitted. However, permission to use this material for any other purposes must be obtained from the IEEE by sending an email to pubs-permissions@ieee.org."

NOTE: Authors are permitted to post their accepted papers, as long as they include the copyright notice above on the on the initial screen displaying IEEE copyrighted material. Upon publication, authors must replace the preprints with either (1) the full citation to the IEEE works with Digital Object Identifiers (DOI) or (2) the accepted versions only (not the IEEE-published versions) with the DOI.

[] One electronic copy of the finalized Double-Column Single-Spaced IEEE-formatted source file of the manuscript in LaTeX or MS Word formats. Any tables must be included in the source file, but figures may be provided separately (see below). However, all captions of figures and tables should be included in the source file. References should also be included, with citations embedded in the source file (do not supply separate BibTeX or Endnote files).

[] If your figures are not already embedded in the source file of your manuscript, you will need to upload separate figure files, each named according to the corresponding figure numbers in the manuscript. The acceptable formats are EPS, Postscript, PDF, Powerpoint (ppt or pptx), and other device-independent graphics formats. Bitmapped graphics are not appropriate for figures containing text or symbols such as diagrams and graphs, and are acceptable only for photographs. We can NOT accept png and jpeg files due to compression artifacts.

[] Editable source files of the IEEE-style brief biosketches and portrait photos of all authors. The biosketches can be included at the end of your LaTeX or Word source file, or submitted as a separate file. For author photos, jpeg files are acceptable, and the naming convention used to identify each photo should be "authorfirstname_lastname.extension".

[] Supplemental electronic material (Multimedia), to illustrate the concepts described by the authors, if applicable. Please read the "Reproducible Research" section below.

NOTE IF THE PAPER HAS MULTIMEDIA DOWNLOADABLE MATERIAL, PLEASE UPLOAD/SELECT UNDER "FILE DESIGNATION -MULTIMEDIA."

[] Contact information including current affiliations, telephones, fax numbers and email addresses of all authors. (If necessary, please modify your existing ScholarOne Manuscripts account information as well).

=====**Reproducible Research**=====

To allow maximum adoption of your work by other researchers, we encourage you to make the code and data used to produce your presented results (figures, tables, etc.) available online. An example of how this can be done is available at http://lcav.epfl.ch/reproducible_research/.

IEEE Xplore can publish data sets, multimedia files and Matlab code along with your paper. For this purpose you can provide a single .rar file, or the links to such files in a README file that will appear on IEEE Xplore along with your paper. It is important to designate the .rar file as "multimedia_materials.rar."

For details, please see

http://www.ieee.org/publications_standards/publications/authors/authors_journals.html#sect6 under "Multimedia Materials."

=====

Guidelines for preparing the IEEE style final materials can be found at:

http://www.ieee.org/publications_standards/publications/authors/DF_IEEE_MIG_MCT_19101.

VERY IMPORTANT: The source files (.tex, .doc, .eps, .ps, .bib, .db, .tif, .jpeg, ...) may be uploaded as a single .rar archived file. Please do not attempt to upload files with extensions .shs, .exe, .com, .vbs, .zip as they are restricted file types.

When the above listed materials have been received it will be confirmed with an email. In due time, you will also be informed you when you can expect to receive galley proofs and the approximate date of publication.

NOTE: By submitting the final files of your manuscript, you are acknowledging that you have read and accepted the rules established for publication of manuscripts, including agreement to pay all over-length page charges, color charges, and any other charges and fees associated with publication of the manuscript. Such charges are not negotiable and cannot be suspended.

=====OPEN ACCESS=====

For Open Access (OA) manuscripts, the author is responsible for payment of open access fees at the discounted rate of \$1,750 per article.

The OA option, if selected, enables unrestricted public access to the article via IEEE Xplore. The OA option will be offered to the author at the time the manuscript is submitted. If selected, the OA fee must be paid before the article is published in the journal.

=====

CORRESPONDING AUTHOR Accounts ONLY: You can find any possible ATTACHMENTS FROM THE REVIEWERS by going to the "Manuscript with Decisions" status link in your Author Center and clicking on "view decision letter". Attachments are located at the bottom of decision letter under "Files attached" heading.

A paper is placed in the publication queue after ALL of the required publication materials have been received. The IEEE CAS Society Publications Office typically processes papers based on the order that the complete publication materials have been received.

In addition, note that the manuscript will be made available on IEEE Xplore within 4 weeks of the date that ALL of the required publication materials have been received. This will be a preprinted version that will later be replaced by the fully edited version after you have submitted the Revised proofs. Both preprinted and fully edited versions will have the same Digital Object Identifier (DOI), and will be equivalent as far as citations are concerned.

If you have any further questions about our process or are experiencing technical difficulties, please contact Desiree Noel at d.noel@ieee.org. If you have questions about the production process, please contact Stephanie Brown at brown.stephanie@ieee.org.

Thank you for your contribution to the IEEE Transactions on Circuits and Systems for Video Technology.

Sincerely,
Dan Schonfeld
Editor-in-Chief, IEEE Transactions on Circuits and Systems for Video Technology
